

Bangzishu “Benny” Huang

• Staten Island, New York • +1 718 668 0899 • bangzishu@gmail.com

Education

Washington University in St. Louis

Incoming Freshmen

- Bachelor of Fine Arts in Design
- Second Major in Marketing

St. Louis, Missouri

Expected Graduation: 2030

Staten Island Technical High School

- Cumulative GPA - 4.0/4.0
- Awards and Honors - Member of National Honor Society, and AP Scholar with Distinction

Staten Island, New York

September 2022 - June 2026

Work Experience

Graphic Design Intern

June 2026 - Present

Origami For Good - NYC Chapter

- Design social media content to drive engagement and grow membership for OFG NYC, adhering to brand guidelines while sharpening graphic design skills across post formats.

Applied Machine Learning Researcher

May 2026 - Present

Algoverse AI

- Researching whether supervised fine-tuning degrades the parallel-decoding speedup of consistency-distilled LLMs (CLLM, Jacobi Forcing), designing controlled experiments across GSM8K, Spider, CodeAlpaca, and MedQA to isolate data-driven vs. training-induced capability loss and evaluate mitigation strategies like consistency replay and subspace-protected fine-tuning.

Startup Fellow (Relay)

May 2026 - Present

BizWorld

- Selected as 1 of 10 teams for the BizWorld YES! Accelerator Summer 2026 cohort, with an opportunity to earn upwards of \$30,000 in pre-seed funding during demo day, while refining Relay's product and go-to-market strategy through structured mentorship.

Project Reviewer

January 2025 - Present

Hack Club

- Reviewed 300+ member-submitted projects for quality and readiness, ensuring each met open-source standards before public release.

Open Source Developer

September 2025 - May 2026

Hack Club

- Shipping open-source hardware and software projects, ranging from independent builds to collaborative tools, contributing to Hack Club's global maker community.

Student Intern

November 2023 - June 2024,

ACE Mentor Program of America, WSP

- Collaborated with a team to redesign a NYC basin into a public aquarium balancing environmental education and recreational use, leading graphic and structural design work.

ACE Mentor Program of America, Ted Moudis Associates

November 2024 - May 2025

- Built foundational skills in construction, engineering, and architecture while contributing to the design of a landmark building renovation, transforming it into a fully accessible community library.

Activities

Stanford iGEM Bioengineering Research Program (SIBRP)

June 2026 - Present

Participant

- Selected for SIBRP 2026 (<4.5%), engaging in synthetic biology research, including team work on a genetic circuit-based probiotic sensor for Parkinson's disease detection.

SecondAid - Emergency Preparedness Kits <i>Founder and Designer</i> Designed and distributed emergency preparedness kits to 250+ students and youth members of the Staten Island community collaborating with schools to promote safety awareness.	November 2024 - Present
Scouting America <i>Assistant Patrol Leader, Patrol Leader, Instructor</i> Planned and volunteered community service projects, most notably, the Oakwood community Food Drive, which reached 2000+ households.	January 2018 - Present
AceAble <i>Founder and President</i> Founded and led a student-run club minimizing language barriers in Asian immigrant households, supporting and engaging 300+ active families through coordinated tutoring resources and community activities.	February 2024 - May 2026

Design Projects

- FlexiBowl**
 - 3-in-1 tableware set with detachable handle and utensils, designed for versatility, portability, and sustainable daily usage.
- ResQ Capsule**
 - Compact emergency rescue device for vehicles, featuring an auto-inflating buoy, air filter, and window breaker for life-saving preparedness.
- Meal Quest**
 - Interactive educational plate that teaches children proper meal portions while incorporating playful elements (unlockable desert portion) to encourage healthy eating habits.
- Arborspira**
 - Autonomous solar-powered drones dispersing biodegradable seeds and pollen by utilizing samara-inspired seed pods, and electrostatic mechanism for pollen dispersion.
- RoboArm**
 - Designed and built a robotic arm controllable wirelessly from a mobile device, integrating custom hardware, embedded firmware, and a companion app interface.

Awards, Honors, and Recognition

- Design MasterPrize [International] - Winner (Safety Design), 4x Honorable Mentions
- NY Product Design Awards [International] - 3x Silver (Tableware, Vehicle Accessories, Kitchen Appliances and Accessories)
- European Product Design Awards [International] - Winner (Industrial Product Design), Honorable Mention (Conceptual Product)
- International Design Awards [International] - 2x Honorable Mention
- un Design Award [International] - 2x Gold and 2x Silver (Conceptual Product)
- World Front Design Award [International] - Gold (Best Sustainable Healthcare Innovation), Silver (Best Consumer and Lifestyle Product)
- Green Concept Award [International] - 1x Finalist
- ISARCH Product Awards [International] - 2x Finalist (ResQ Capsule, FlexiBowl)
- 2026 Conrad Innovator [International]
- Eagle Scout [National]
- Media Recognition: Muse World, WODACC Global Influential, Luxiders, Wonder Awards, SI Live

Additional

Language Skills: Chinese Mandarin (Native), English (Fluent), Russian (Conversational)
Technical Skills: CAD software (AutoDesk, Rhino, SketchUp), Adobe Creative Suite, Conceptual Sketching, Video Editing
Interests/Hobbies: Music, Basketball, Volleyball, Gaming, Photography, Design
